SUMMARY

Hello, my name is Kenil raval and I am a passionate block developer. I have a deep understanding of the blockchain ecosystem, including the underlying technologies and the potential for innovation that this field offers. I have extensive experience working with various blockchain platforms, including Ethereum, and Hyperledger, and I am proficient in programming languages such as Solidity, Java ,solidity ,Reactjs Node js and Python.

EXPERIENCE

Blockchain Developer

Empiric Infotech LLP

📅 12/2022 - Present   📍 Surat, Gujarat, India

Innovating at the intersection of technology and trust! ✉ As a Blockchain Developer at Empiric Infotech LLP, I'm contributing to the evolution of decentralized systems that are shaping the future of industries

- As a Blockchain Developer at Empiric Infotech LLP, I've been at the forefront of revolutionizing the potential of decentralized systems. One of my notable achievements has been leading the development and implementation of a secure and transparent digital identity verification system on the blockchain. By leveraging blockchain's immutability, I successfully designed a solution that ensures data integrity and privacy while simplifying the verification process for users. This achievement not only underscored my proficiency in developing smart contracts and cryptographic protocols but also highlighted my dedication to creating real-world solutions that redefine trust and security. I'm eager to continue driving innovation within Empiric Infotech as we shape the future of industries through cutting-edge blockchain technology

Python Developer

Empiric Infotech LLP

📅 07/2022 - 11/2022   📍 Surat, Gujarat, India

Turning code into creativity at Empiric Infotech LLP! As a Python Developer, I'm immersed in the world of coding and problem-solving, crafting efficient solutions that power innovation

- Driving innovation through code and creativity! As a Python Developer at Empiric Infotech LLP for the past five months, I've harnessed the power of Python to deliver impactful solutions. One of my notable achievements during this time has been optimizing a critical backend process, reducing processing time by 30%. By implementing advanced algorithms and refining database queries, I enhanced system efficiency and significantly improved user experience

Data Entry Operator

Freelancer

📅 07/2019 - 12/2019   📍 India

- Efficient and Detail-Oriented Data Entry Freelance

PROJECTS

NFT Marketplace

📅 02/2023
🔗 https://mellow-starship-7e313c.netlify.app/

Discover a World of Unique Digital Assets on Our NFT Marketplace

- A Non-Fungible Token (NFT) marketplace is a digital platform where users can buy, sell, and trade NFTs. NFTs are unique digital assets that represent ownership or proof of authenticity of a specific item or piece of content using blockchain technology. Unlike cryptocurrencies such as Bitcoin or Ethereum, NFTs are not interchangeable on a one-to-one basis due to their uniqueness and specific attributes

Ethereum indexer

📅 05/2023
🔗 https://github.com/ravalkenil/Etehreum_indexer

Unlocking Insights with Ethereum Indexing Services

- The Ethereum blockchain – our Ethereum Indexer. Delve into a world of data where blockchain transactions and interactions come to life through organized and accessible indices. Our Ethereum Indexer is your gateway to uncovering valuable insights and harnessing the power of blockchain data like never before

Auth0 react

📅 12/2022
🔗 https://github.com/ravalkenil/Auth0_react

Empowering Seamless User Authentication with Auth0 and React

- user authentication is both effortless and secure, thanks to the synergy of Auth0 and React. Our commitment to providing a seamless experience begins with the robust features of Auth0 seamlessly integrated with the dynamic capabilities of React

Management system

📅 11/2022
🔗 https://github.com/ravalkenil/Management_system

Leave Management System

- Present a robust Leave Management System enriched with a Teacher Approval Workflow, meticulously crafted using the Django framework. This system optimizes the leave request process for students while providing teachers with a seamless approval mechanism

Registration & login

📅 09/2022
🔗 https://github.com/ravalkenil/Registration_login_Django

Seamless Registration and Secure Login with Django Authentication

- where your data security is our top priority. With Django's robust authentication system, your registration and login process is both seamless and fortified

EDUCATION

Bachelor's degree, BSC.IT(int M.SC.IT)

Bhagwan Mahavir College of Education, Surat

📅 07/2020 - 04/2023

12th Std

i.p.svani

📅 07/2018 - 05/2019

COURSES & CERTIFICATES

BSC.IT

HTML / CSS

Ethereum and Solidity

Cryptocurrency Technologies

Ethereum Development

PROJECTS

Blockchain   **Smart contract**   **Dapp**

Nft Marketplace   **Ethereum indexer**

Hyperledger Besu
